I love understanding how the world works on a fundamental level, like with my studies in biochemistry I hope to gain a deeper understanding of how great software works. I look forward to adding value with my attention to detail. I am excited to bring my creative energy in line with my analytical skills to be a great asset as a full-stack developer.

Relevant Work

Kiki's Delivery Service Game -   **https://bosunkim92.github.io/kikis-delivery-game**
- A memory matching card game with my own custom art I created with Photoshop.
- The game is written in HTML/CSS with JavaScript that creates a new randomized game each time.

Ghibli Gibberi -   **https://ghibligibberi.herokuapp.com/**
- A simple website where Studio Ghibli film fans can write a review on a specific film and share comments.
- The website does full CRUD operations based on HTTP requests.
- The website is written in HTML, CSS, JavaScript, Express, Node, MongoDB, and uses Google OAuth Passport login.

PlanIt -   **https://planit2.herokuapp.com/**
- PlanIt provides a one-stop platform for plan-makers, letting users create plans, attend other people's events, and help them decide the location of the activity.
- The website implements RESTful API with full CRUD operations.
- The website is written in Python, Django, PostgreSQL, JavaScript, jQuery, HTML/CSS, and uses MapBox API.

Doodleap -   **https://doodleap.herokuapp.com/**
- A website that lets people post pictures of their art and lets them view other peoples art. Users can react to artwork by 'liking' or 'inspiring' the art post.
- The website is built with MERN stack (MongoDB, Express.js, React, Node.js) and does full CRUD operations.

Technical Skills & Human Skills

- JavaScript | MongoDB | Mongoose | Node.js | Express.js | Python | Django | PostgreSQL | jQuery | React | | HTML/CSS | C | Git | Github
- Procreate | Photoshop
- Business Management | Marketing | Customer Service
- Bilingual (Korean & English) | Working proficiency in Japanese
